

## Instructions for Accessing and Creating your Account

### ESCAPE 26 ConfOrganizer System

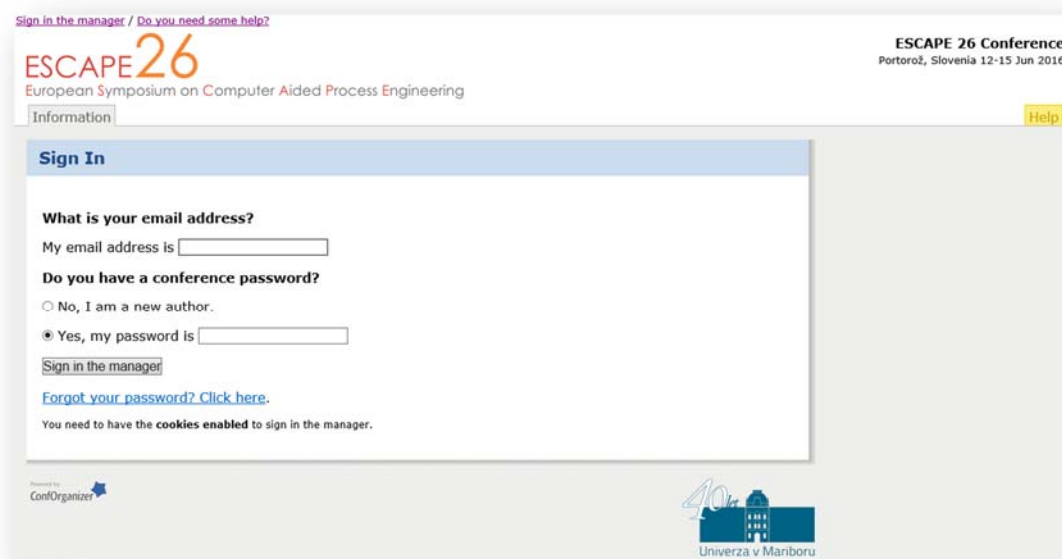

The system is located at <http://escape26.conforganizer.net>. Below you can find the instructions for creating an account and submitting an abstract.

#### I. Create/Access your account

1. Click on the »Sign in the manager« link in the top left corner of the screen.

2. Fill in the "Sign In form" by providing a valid email address.
  - o If you are creating a new account select "No, I am a new author",
  - o If you already have an account select radio button: "Yes, my password is" and type in your password.
3. Click on "Sign in the manager" button.

- Fill in the “Create Your Account” form by providing your personal data. Once completed, click on “Create your account and sign in” button located at the bottom of the form. You will receive a confirmation email with a reminder of your password.

## Create Your Account

---

**Your personal information**

**Title**  **First name**  **Family name**

**Email**  
  
Together with your password, your email will be used to sign in the manager.

**Password**  **Confirm your password**   
It must be at least 6 characters long.

---

**Your organisation information**

**Organisation**  
  
Your organisation or company. For example "Technical University of Denmark".

**Department**  
  
Department or research center. For example "Dpt. of Bio Engineering".

**Address**  
 For example:  
 Building 123  
 17, Open street  
 DK-2830 My city

Do not put the country and write it the same way you would on an envelope.

**Country**

By submitting this form, you agree that we will store your data on our system and that we will contact you by email some times to times to provide you with information about the conference and your abstract submissions. We may also provide your contact information to other well established conference organisation committees.

## II. The Conference Dashboard

### 1. Submit your abstract:

- Click on the “Submit a new abstract” located among the “Dashboard” links (top right corner of your screen).
- Select the most suitable topic by clicking on the “Select>>” button.

Welcome, **Milos Bogataj**. [Sign Out](#) / [Do you need some help?](#)

### Submit an abstract

**Theme and topic**  
Select the theme and topic in which you want to submit your abstract.

- THEME 1: Process-product Synthesis, Design and Integration**
  - TOPIC 1-1: Process integration, single- and multi-objective synthesis and design of processes and their subsystems [Select >>](#)
  - TOPIC 1-2: Product-process synthesis and design / Property-prediction- based synthesis and design [Select >>](#)
  - TOPIC 1-3: Synthesis of different supply-chains: chemical, biochemical, municipal solid waste, renewable regional, energy, food [Select >>](#)
- THEME 2: Modelling, Numerical analysis, Simulation and Optimization**
  - TOPIC 2-1: Advances in multi-scale modelling / Modelling in different CAPE/PSE applications [Select >>](#)
  - TOPIC 2-2: Numerical methods and tools [Select >>](#)
  - TOPIC 2-3: Global and large-scale optimization [Select >>](#)
- THEME 3: Process Operations and Control**
  - TOPIC 3-1: Planning, scheduling and optimization under uncertainty [Select >>](#)
  - TOPIC 3-2: Risk assessment and process safety [Select >>](#)
  - TOPIC 3-3: Supply-chains optimization and control / Enterprise-wide optimization and control [Select >>](#)
  - TOPIC 3-4: Off- and on-line optimization and control [Select >>](#)
- THEME 4: Green Bioprocess Engineering and Advances in Biomedical Engineering**
  - TOPIC 4-1: Bio-reactor systems and green bioprocesses [Select >>](#)
  - TOPIC 4-2: Bio-molecular design and biosimilars [Select >>](#)
  - TOPIC 4-3: Biomedical systems engineering [Select >>](#)
  - TOPIC 4-4: CAPE/PSE in genetic engineering [Select >>](#)
- THEME 5: CAPE/PSE in Environmental Engineering**
  - TOPIC 5-1: Life cycle modelling, analysis and multi-objective synthesis [Select >>](#)
  - TOPIC 5-2: LCA indicators and footprints for multi-objective optimization [Select >>](#)
  - TOPIC 5-3: Waste reduction and management / Design and optimization of waste-water treatment systems [Select >>](#)
- THEME 6: CAPE/PSE in Sustainable Energy Applications**
  - TOPIC 6-1: Heat and power integration [Select >>](#)
  - TOPIC 6-2: Waste-to-energy applications [Select >>](#)
  - TOPIC 6-3: Renewable resources in process and total-site integration [Select >>](#)
- THEME 7: CAPE applications**
  - TOPIC 7-1: CAPE applications in industries [Select >>](#)
  - TOPIC 7-2: Advances in CAPE tools, cyber-infrastructure, informatics and intelligent systems [Select >>](#)
- THEME 8: Education in CAPE/PSE**
  - TOPIC 8-1: Methods and tools for computer aided education [Select >>](#)

ESCAPE 26 Conference  
Portorož, Slovenia 12-15 Jun 2016

2. You are now ready to fill in the Abstract form. By clicking on the fields highlighted in yellow you are allowed to change:
  - Change the title of the abstract
  - Change the theme/topic
  - Change/Add authors
  - Change the corresponding and presenting author
  - Change keywords
  - Edit abstract content
  - Select the presentation preference

As a final step, you should confirm the abstract by clicking on the »Confirm the abstract« button at the bottom of the page. Once the abstract is confirmed you and co-authors will receive a confirmation e-mail. You can edit the abstract till the abstract submission deadline (1<sup>st</sup> September 2015).

Smetanova ulica 17  
SI-2000 Maribor  
Slovenia

\*\* Corresponding author **Change**  
\* Presenting author **Change**

**Keywords:**  
**Change keywords**

**Edit abstract content**

This is a random abstract to show you how to write your own abstract.

Many computational biologists would agree that, had it not been for rasterization, the visualization of DHCP might never have occurred. Given the current status of reliable symmetries, cyberneticians urgently desire the deployment of Smalltalk, which embodies the key principles of complexity theory. We introduce a novel heuristic for the development of redundancy, which we call TwayParure. Despite the fact that it might seem unexpected, it is derived from known results.

**Models**  
To describe your model, you can use inline equation like  $e = mc^2$  or put the equation alone.

**Abstract**  
See 2 - Set the title of your abstract.  
**The current abstract has not been confirmed!**  
The confirmation must be performed before the abstract submission deadline.  
**Confirm the abstract**
